Play, active recreation and sport at Alert Level 2

Your Alert Level will depend on where you are in New Zealand. The current Alert Level for your region can be found at [https://covid19.govt.nz/covid-19/restrictions/current-alert-level/](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/) As at 8 October 2021

Alert Level 2 – Reduce

At Alert Level 2, you can do your usual sport and recreation activities if you can do them safely. But if you are sick, stay home.

When exercising, keep a 2 metre distance from people you do not know.

You can do activities like:
- walking, cycling and hunting, including on public conservation land — overnight trips are okay
- swimming at a public swimming pool, but there will be restrictions
- going to the gym, but there will be restrictions
- boating and motorised watersports.

Subject to the range of public health measures outlined below, play, active recreation and sport can take place under Alert Level 2. This includes contact team sports and physical activities as long as contact tracing arrangements and good hygiene measures are in place, particularly washing and drying of hands with soap, and regular cleaning of equipment and surfaces are in place. There is also now a legal requirement to keep a record of those who attend certain facilities such as indoor public facilities (e.g. swimming pools, recreation centres etc.) and exercise facilities (e.g. gyms, sports venues, yoga studios etc.) through the COVID Tracer App or an alternative means.

Indoor sport and recreation facilities such as gyms, swimming pools, dance studios and health clubs can open, but with extra safety measures. You will need to keep 2 metres apart from others and facilities may need to restrict numbers to help with physical distancing. It is recommended that you wear a mask at indoor sports facilities apart from when you are exercising or playing sports.

Public health measures

At Alert Level 2, you can leave home, but you must follow public health measures and consider others around you.

Contact Tracing and Mandatory Record Keeping

It is mandatory for any business or service to display a QR code for the NZ COVID Tracer app prominently at the main entry point of their building. Further information on the QR code and how to get one can be found [here](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/).

There is also now a legal requirement to keep a record of all those aged 12 and above who attend certain facilities such as indoor public facilities (e.g. swimming pools, recreation centres etc.) and exercise facilities (e.g. gyms, sports venues, yoga studios etc.) through the COVID Tracer App or an alternative means. It is also recommended that QR code scanning and record keeping is undertaken in other places where people gather such as changing rooms. More information about these requirements can be found [here](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/).

Gatherings, events and public venues

Community sporting events at both indoor and outdoor sports are not restricted on the number of spectators, but physical distancing of 1 metre needs to be maintained. For elite, professional and semi-professional sport, players are considered employees in a workplace and are not subject to gathering rules. But spectators are considered a gathering and must obey the gathering rules. This means they must physically distance of 1 metre at all times.

Indoor sport and recreation facilities such as gyms and pools such as gyms, swimming pools, dance studios and health clubs can open, but with extra safety measures. You will need to keep 2 metres apart from others and facilities may need to restrict numbers to help with physical distancing.

A person in charge of a social gathering must ensure records are kept for contact tracing purposes, except where every person in a gathering knows, and can identify for the purposes of contact tracing, every other person who is a participant in the social gathering. This includes in your home, community hall or other space.

You must not participate in any gatherings if you have COVID-19 symptoms or if you need to be in isolation for any reason.

Physical distancing

Keep your distance when out and about and stay 2 metres away from others you don’t know, both indoors and outdoors.

It is recognised that contact during physical activity will occur but this should be minimised as much as possible, especially off the field of play.

Face coverings

At Alert Level 2 the risk of COVID-19 being present in the community is higher. It is recommended that you wear face coverings when you are indoors at sport and recreation facilities such as gyms, dance studios and health clubs apart from when you are exercising or playing sports. It is recommended that all customer-facing staff at indoor sport and recreation facilities wear a face covering while serving customers. More information about the rules applying to face coverings can be found [here](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/).

Cleaning and Hygiene

Surfaces and equipment should be regularly cleaned and disinfected where practicable.

Good personal hygiene practices should continue – wash and dry your hands before and after activities, cough into your elbow and don’t touch your face.

General guidance

Stay home if you’re sick and do not take part in sport or recreation. If you have flu-like symptoms, self-isolate at home and get tested immediately.

People at high risk of severe illness from COVID-19 (particularly older people and those with existing medical conditions) should take additional precautions when undertaking physical activity. More information can be found [here](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/).

Business premises (e.g. cafés/bars in club rooms, or pro shops) can be open for staff and customers provided that they meet the relevant workplace requirements.

What does this mean for play, active recreation and sport generally?

Alert Level 2 allows for opportunities to engage in play and active recreation and allows for competitive sport, if the public health measures outlined above are implemented to create a safe environment. It is essential to make sure all the protocols are in place before undertaking activity and ensure that everyone in your club or organisation is on the same page. Please work closely with your regional and/or national organisation to get advice on how to make your activity safe.

Personal hygiene is a key public health measure that will reduce the risk of transmission of the virus through physical activity. Each participant should wash their hands with soap and dry them before and after play or use hand sanitiser if this is not possible. There will also need to be regular sanitisation of shared equipment. In addition to practicing good hygiene, the ability to record participants to aid contact tracing is very important. It is now mandatory to keep a record of those who attend certain facilities such as indoor sport and recreation facilities through the COVID Tracer App or an alternative means.

More information about these requirements can be found [here](https://covid19.govt.nz/covid-19/restrictions/current-alert-level/).

Playgrounds, gyms, pools and public courts will be able to open, subject to meeting the above public health measures. Public conservation land is open to the public for walking, biking, and hunting but there are guidelines on the use of DOC huts and campgrounds. Check that where you want to go is open before setting off – you may need to book in advance.

During Alert Level 2 there may be some refinements to the public health measures. Any implications for play, active recreation and sport as a consequence of changes to the government’s expectations and measures will result in these guidelines being updated and reissued.

The activity table for Alert Level 2 follows on pages 2 and 3.
**Alert Level 2**

### Contact Tracing and Mandatory Record Keeping
Contact tracing and record keeping for all participants and spectators aged 12 and above is now mandatory for certain indoor facilities (e.g. swimming pools, recreation centres, gyms, clubrooms, yoga studios etc.). All facilities and organisations must also display the NZ COVID Tracer QR code at every entry point to allow people to track their own movements.

### Cleaning and Hygiene
You must adhere to basic hygiene measures, including washing and drying hands with soap before and after any activity. Also exercise caution with common touch points (e.g. gates or doors) and wash or sanitise your hands after touching these surfaces. Facilities must have a written plan for safe operation in place. Sanitation measures can be found [here](#). Facilities, water, soap and towels/drier should be made available for participants to wash and dry their hands or hand sanitiser (containing at least 60% alcohol).

### Physical Distancing
You should stay 2 metres apart from people you don't know (e.g. outside of direct friends and family). You should wear face coverings in situations where physical distancing is not possible, apart from when you are exercising or playing physical sports.

### Risky activities
Activities should only be completed within your confidence and skill level to continue to reduce the need for emergency services.

### Play
(e.g. playing in homes, neighbourhoods and playgrounds)

#### Alert Level 2
Public and school playgrounds are able to open and families can get together for their children to play. You can drive to play in a public space, for example a beach or a park.

#### Scenarios at Level 2
You should wash and dry your hands or use hand sanitiser before and after using play equipment. You should also try not to touch your face, cough and sneeze into your elbow, and if you have cold or flu symptoms to stay off the equipment.

### Active Recreation
(e.g. walking or going to the gym)

#### Alert Level 2
Contact tracing and record keeping for all participants and spectators aged 12 and above is now mandatory for certain indoor facilities (e.g. swimming pools, recreation centres, gyms, yoga studios etc.). All facilities and organisations must also display the NZ COVID Tracer QR code at every entry point to allow people to track their own movements.

#### Scenarios at Level 2
Contact tracing and record keeping, either paper based or e.g. in an app, is now mandatory and for all participants and spectators aged 12 and above must be completed. You must also display the NZ COVID Tracer QR code to allow people to track their own movements. The register should be accessible to the Ministry of Health for contact tracing purposes at all times for up to 2 months after the contact took place. This process should be detailed in your organisation’s WorkSafe plan. You may need to consider restricting the number of spectators or asking people to register in advance.

### Cleaning and Hygiene
All participants should wash and dry their hands before and after partnering in any play, active recreation or sport. Ideally, they should be advised of this in advance of attending to allow time for this to happen safely. Measures should be taken to minimise the sharing of equipment if possible. Equipment must be washed and dried before and after use. For example, balls washed before and after each game.

### Physical Distancing
Physical distancing remains important, when people are interacting with people they don’t know and that wouldn’t be able to be easily traced. For example, while mountain biking, avoid gathering at trail heads or sections of the trail where physical distancing will be difficult.

#### Contact Tracing and Mandatory Record Keeping
When exercising take a note of where you have been. For example, make a note of the route you run and when. If visiting a public facility (e.g. a gym or swimming pool) you must sign in via the COVID Tracer App or complete their register in advance. The register should be accessible to the Ministry of Health for contact tracing purposes at all times for up to 2 months after the contact took place. This process should be detailed in your organisation’s WorkSafe plan. You may need to consider restricting the number of spectators or asking people to register in advance.

### Physical Distancing
Try to maintain 2m physical distancing (e.g. when running make sure to run single file when approaching others and give them a wide berth when passing). Face-to-face coaching can take place (e.g. personal training, swim coaching etc.) but try and keep your distance where possible (e.g. if sharing a swim lane etc.) but try and keep your distance where possible (e.g. if sharing a swim lane). You should stay 2 metres apart from people you don’t know and wouldn’t be able to trace.

### Risky activities
Activities should only be completed within your confidence and skill level to continue to reduce the need for emergency services assistance.

### Activities previously not allowed at higher Alert Levels
‘Backcountry activities’ such as hunting, tramping, ski touring, rock climbing and mountaineering are allowed at Level 2 and overnight trips are permitted, although these should still be easy trips within your ability and to places you’ve been before. The Department of Conservation has further advice on specific public health measures to take and the availability of their facilities. More information can be found [here](#).
